The Teaching Company

Our own incomplete, irregularly revised recommended reading list follows:

Gould, Stephen J. “The Freezing of Noah.” *The Flamingo’s Smile*. New York: W. W. Norton & Company, 1985, 114-125. This is a very good illustration of how scientists do not treat “belief” with the same kind of commitment as people of religious faith. I think the notion of belief is a central misunderstanding in the entire issue.
